CLAIMS:

- 1. A DNA comprising the nucleotide sequences of the Sequences No. 1 and No. 2 in the Sequence Table.
- 2. The DNA according to claim 1, wherein the Sequence ID No. 1 includes the first exon of the OCIF gene and the Sequence ID No. 2 includes the second, third, fourth, and fifth exons.
- 3. A protein exhibiting the activity of inhibiting differentiation and or maturation of osteoclasts and having the following physicochemical characteristics,
 - (a) molecular weight (SDS-PAGE):
 - (i) Under reducing conditions: about 60 kD,
 - (ii) Under non-reducing conditions: about 60 kD and about 120 kD
 - (b) amino acid sequence:
 includes an amino acid sequence of the Sequence ID No.
 3 in the Sequence Table,
 - (c) affinity:
 exhibits affinity to a cation exchanger and heparin, and
 - (d) heat stability:
 - (i) the steoclastogenesis-inhibitory activity is reduced when treated with heat at 70° C for 10 minutes or at 50°C for 30 minutes,
 - (ii) the osteoclastogenesis-inhibitory activity is lost when treated with heat at 90°C for 10 minutes.
 - 4, A process for producing a protein exhibiting an

Oda 3

activity of inhibiting differentiation and/or maturation of osteoclasts and having the following physicochemical characteristics,

- (a) molecular weight (SDS/PAGE):
 - (i) Under reducing conditions: about 60 kD,
 - (ii) Under non-reducing conditions: about 60 kD and about 120 kD;
- (b) amino acid sequende:

includes an amino dcid sequence of the Sequence ID No.

3 of the Sequence Table,

(c) affinity:

exhibits affinity to a cation exchanger and heparin, and

- (d) heat stability:
 - (i) the osteodlastogenesis-inhibitory activity is reduced when treated with heat at 70° C for 10 minutes or at 56% for 30 minutes,
- when treated with heat at 90°C for 10 minutes, the process comprising inserting a DNA including the nucleotide sequences of the sequences No. 1 and No. 2 in the Sequence Table into an expression vector, producing a vector capable of expressing a protein having the above-mentioned physicochemical characteristics and exhibiting the activity of inhibiting differentiation and/or maturation of osteoclasts, and producing this protein by a genetic engineering technique.
